**MAIN IDEA**

Do millionaires have different habits to everyone else? They do but they're not as dramatic as you might think. The reality is millionaires make some small but significant shifts in their habits which then yield big results when applied over time.

Millionaires cut through all the noise and complexity of modern life and draw a straight line between where they are now and where they want to be in the future. You can do the same. To take your life and your career to the next level, get to work applying different habits.

To be more successful in the future, you don't need to figure out ways to add more time to your day. Instead, incorporate these success habits into your daily routine. Replace the habits which have taken you to where you are today with millionaire success habits which will take you to where you want to be in the future. The time is right to adopt millionaire success habits.

*"It doesn't matter where you're coming from. It only matters where you want to go."*

– Dean Graziosi

*"The difference between successful people and unsuccessful people is that successful people do the things the unsuccessful people don't want to do."*

– John Paul DeJoria

*"Successful people have a core set of habits that propel them. The average person confuses success with luck. But luck has nothing to do with it. Millionaire success habits do. I have recipes that will help you make tiny shifts in your habits that will in turn make you unrecognizable to yourself down the road. We only need tiny shifts in our millionaire success habits today to be completely different in the near future and for years to come."*

– Dean Graziosi
